

\$3/month Best Cheap WordPress blog hosting to Start a blog or FREE with Bluehost

Before starting this blog, I searched for the cheapest WordPress shared hosting provider. I found hundreds of options. Not all of them can be called as the Best Cheap WordPress blog hosting provider. As a new blogger, honestly, you don't need to spend money on expensive shared hosting, dedicated hosting or Virtual Private Server. There will be other expenses when starting a Blog so save your money for those instead of paying huge monthly expenses for high performance hosting, that you may actually not need.

In this article, I will take you through all the **steps I personally took** to start www.fivestepguide.com. I have shown details of how I did extensive comparison amongst more than 30 hosting providers to identify the Best Cheap WordPress blog hosting. In the end, I have also mentioned [my reason in choosing my current hosting provider](#) for www.fivestepguide.com, www.5stepguide.com, www.startwithfin.xyz, www.5sg.top

My primary methods of research for shortlisting the top 10 Best Cheap WordPress blog hosting providers were:

- Extensively running through websites claiming to be the cheapest WordPress shared hosting,
- reading reviews on various popular review websites like Trustpilot and Hostadvice,
- asking dozens of questions through hosting provider's live chat support.

Steps I took to find the best shared hosting or WordPress?

Whenever I start researching on any topic, I always begin with Google search.

If you Google search for Best WordPress blog Hosting Providers, you will get almost 82 million results. Obviously, one cannot go through even one-millionth of all those websites. In that case how to finalize "the one" for your new blog?

1. Look at top 3 google search pages → To start with, I opened the top 30 links (first 3 Google search pages) and took a quick glance at all the pages and noted all common shared WordPress hosting they all suggested. I could then compile a list of top 30 WordPress hosting providers.
2. Filter according to your budget → I firstly filtered those on price since I don't want to spend too much on hosting for my new website.
3. Web hosting checklist → I then ran all the selected websites through my checklist of what I needed from the best cheap WordPress blog hosting. Features that could be seen on the hosting provider's website itself. Features like number and size of databases, number of domains and subdomains, number and size of email accounts, CPU and RAM configuration, SSL, malware scanning, and service support timings. Using those filters I removed all hosting websites not meeting my web hosting checklist criteria.
4. Check customer review websites → Thereafter, I checked customer review websites like Trustpilot and Hostadvice for customer reviews. I further filtered my cheapest shared

WordPress hosting providers with a Trustpilot score of more than 4.5 out of 5. If a hosting provider didn't have any mention on Trustpilot, then I kept a note of it while looking at reviews on Hostadvice.

5. Evaluate Customer support through live-chat → Finally, I selected 10 Best Cheap WordPress blog hosting providers to do further research. I then spoke with customer service executives over live-chat and asked several questions ranging from most basic to slightly more technical.

All WordPress hostings I discuss here come with an **inbuilt one-click WordPress installation** and **cPanel**. This helps you in installation, management & configuration of your website with far less time and effort.

Five point checklist to evaluate a web hosting provider

Any web hosting provider that you select must be carefully evaluated on at least the following 5 points:

1. **Features** e.g. the number of databases, total database size, total bandwidth, number of email accounts and so on
2. Hosting server **speed** as estimated by CPU and RAM configuration, and data centers.
3. **Security** features like SSL, and 2FA for admin login
4. 24x7 real time live chat or quick email **support**
5. Initial and renewal **price**

Top 10 WordPress hostings In Brief

Following is a summary on all the 10 Best Cheap WordPress blog hostings I selected for doing an intensive research out of the 30 odd cheapest WordPress shared hosting providers I looked at initially.

Note: As part of my checklist, I looked at only the starter plan by each WordPress hosting provider. After all, once you try, and you like, then you can easily upgrade to a faster plan with more features.

All companies listed here have similar features like Unmetered bandwidth along with Unlimited Databases, FTP, Email, and sub-domains as well as FREE SSL. Almost all of them have between 5-15 GB space, 2 GB RAM + 2 GB CPU, and provide 24x7 chat support. You are allowed to host just 1 website in almost all of them in the most basic plan.

This is not a website hosting ranking. This is just a list of top 10 web hostings based on my research and personal experience. For each hosting provider, the following expand-collapse section highlights ONLY those **positives** and **negatives** which sets it apart from others.

[BLUEHOST](#) – FREE website from World’s most popular hosting, if you get \$200 ad credits.

[SITEGROUND](#) – Highest rated budget shared hosting on all independent reviews

[FASTCOMET](#) – 13 data centers superfast hosting @ \$3 p.m. No long-term commitment

[HOST ARMADA](#) – 4.9 / 5 rated with NGINX / LiteSpeed server cache

[GREENGEEKS](#) – LiteSpeed server cache hosting. Absolute YES! for green energy.

[SCALA HOSTING](#) – Remarkably rated shared hosting with exceptional security features

[MILESWEB \(\\$2 PLAN\)](#) – Cheapest and Fastest hosting with unmatched CPU & RAM @ \$2 p.m

[DREAMHOST](#) – Hosting service recommended by WordPress. 3 months of trial @ \$3 p.m

[TMD HOSTING](#) – 3-layered cache + Weebly Website builder. 60 days of trial @ \$2 p.m

[HOSTGO! \(DRIVE PLAN\)](#) – Cheapest & Fastest shared WordPress hosting with Exceptional 24×7 support (boon for new bloggers)

**** Note:** Bluehost is not well-rated in Trustpilot but is the world’s most popular website hosting service. Why did I include it here? Because [I definitely consider it](#) among the 10 Best Cheap WordPress blog hostings if you get \$150-200 (depending on your resident country) Google and Bing ad credits. This way you will effectively get a great hosting for FREE.

Bluehost ★★★★★ ½

More than a two decade old company, Bluehost, host 2 million websites. It comes with reliable uptime, fast server speed, and feature-packed cheap shared hosting plans. You can easily rely on their 24/7 live chat and phone support and in case you don't like it, there is always a 30-day money-back guarantee. They also have a superb uptime and fast page loading speed.

Their basic plan is priced at less than \$3 (75% discount) [if you follow this link](#).

Infrastructure and features of Bluehost

Bluehost is also one of the hosting providers recommended by WordPress.org. Bluehost has as good infrastructure and technology stack as its competitors.

- Unlimited bandwidth, subject to Fair Usage
- 50 GB SSD storage
- 1 FREE domain name for one year
- Free daily backups
- Can host single website only
- 20 databases with a generous maximum database size of 5 GB.
- 5 emails accounts

Unlimited FTP account

- Your account will be sharing resources on a server with 2.4GHz 16-Core AMD Opteron, 256 GB DDR3 RAM and 64TB SSD storage
- Litespeed cache on server
- Datacenters only in US

Bluehost Security

It offers the best security features like Free SiteLock and CodeGuard, generally paid services in other WordPress hostings. You can also count on FREE SSL certificate and advanced ModSecurity.

Website essential services

- 1 free website transfer
- 1 Free Domain registration
- Free website setup
- Smooth and fast sign-up process with instant activation.

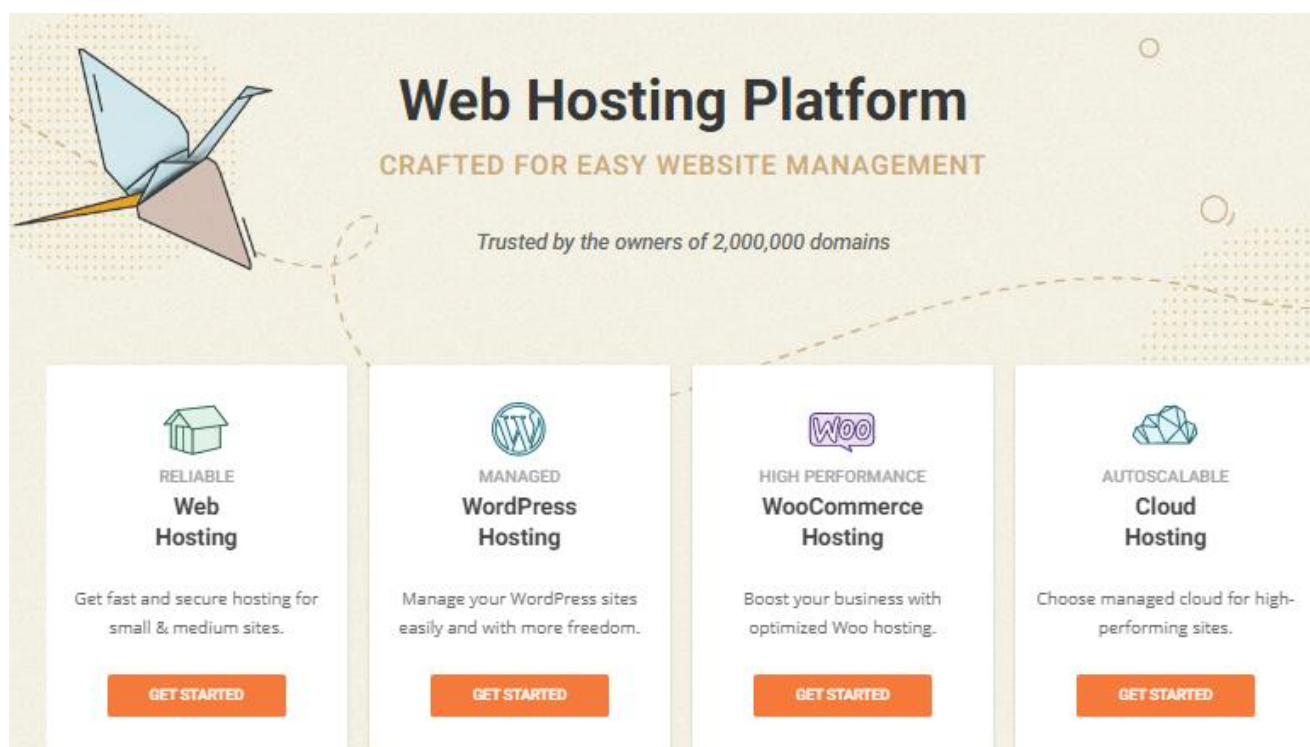

Bluehost doesn't have a good Trustpilot rating but their features and support are worth giving a try. On first sign-up you will get marketing credits between US\$ 150 to 200, depending on the offer ongoing at that time. **This effectively means it is really the cheapest WordPress shared hosting since you get your entire hosting for FREE**

You can check by clicking below if your domain name is available. If yes, you may click further to continue buying from BlueHost. [Click here](#) or banner below to open an account with Bluehost.

SiteGround ★★★★★

A company started in 2004 with a steady growth, SiteGround, has quickly reached the top of the ladder.

Over the years, it has gained the trust of hugely popular names in WordPress universe such as WPBeginner.com and Yoast of Yoast SEO.

It is indeed considered one of the Best Cheap WordPress blog hostings providers by independent tests worldwide. SiteGround comes with reliable uptime, fast server speed because of NGINX servers, and feature-packed shared WordPress hosting plans.

Any website hosted on SiteGround gets the benefit of SG Optimizer plugin and HTTP/2 support to get exceptional website loading speeds.

Their exceptional 24/7 live chat and phone support always comes handy when you get into a problem. All plans come with a 30-day money-back guarantee.

SiteGround has features that only high-priced hosting providers provide. Features such as staging, own server caching, Git repositories, free integrations with CloudFlare or Let'sEncrypt (SSL).

Their basic plan is priced at \$4.95 (subject to ongoing offer) [if you follow this link](#).

Siteground benefits and features

SiteGround has one of the best loading speeds in shared hosting. It also offers more features than competitors (Staging and Git environments)

- Unlimited bandwidth, subject to Fair Usage
- 10 GB SSD storage
- Free daily backups
- Can host single website only
- Unlimited databases
- Unlimited emails accounts
- Unlimited FTP account
- HTTP/2 enabled servers
- NGINX backed servers
- In-house server monitoring
- One of the fastest hosting servers in many independent tests
- 1 GB RAM and 1 CPU
- 6 Datacenters globally

Siteground Security

SiteGround offers exceptional security features including the standard Bot attack protection and Network firewall as well as FREE SSL certificate and advanced ModSecurity.

Website essential services

The 24x7 support team is quick, knowledgeable and effective.

- 1 free website transfer
- Free website setup
- Smooth and fast sign-up process with instant activation.

[Click here](#) or banner below to open an account with SiteGround.

FastComet ★★★★★

What makes the FastCloud Awesome

Performance that exceeds your expectations and features you are about to fall in love with

 <p>Free Domain Transfer Quick and easy – no transfer fee. We will renew your domain for one year free of charge.</p>	 <p>SSD-Only Cloud Up to 300% faster access to your files and databases compared to non-SSD hosting providers!</p>	 <p>Free Cloudflare CDN Distribute your content around the world, so it's closer to your visitors (speeding up your site).</p>	 <p>Powered by cPanel The most popular and powerful web hosting control panel for easy point-and-click management of your hosting account.</p>
 <p>Daily and Weekly Backups Free daily and weekly backups of your data to keep you safe. When others charge for this, we don't!</p>	 <p>Free 24/7 Priority Support Because there is no great hosting without great technical support that cares about your website.</p>	 <p>Free Managed Migrations Our migration experts provide fast managed transfers on all plans, including moving of all your files, databases and emails.</p>	 <p>100% Satisfaction or Money Back Guarantee 45 days money-back guarantee for Cloud Shared Hosting and 7 days for VPS/DS Servers.</p>

A high quality web hosting with super speed, high level of security, and great customer service is what is coming your way if you open an account with FastComet. Their basic plan is priced at less than \$3 (70% discount) if you [follow this link](#) and comes with a 45-day money-back guarantee.

It is a feature packed WordPress hosting service. Even the most basic plan has many fantastic features.

Basic infrastructure and resources

FastComet has top of the line infrastructure and technology stack. All plans benefit from the following features.

- 15 GB SSD storage
- Free daily backups
- Can host single website
- Unlimited database
- Unlimited emails
- Unlimited FTP account
- 2GB RAM and 2 CPU core
- CloudLinux servers
- 11 data centers across the world.

Security

It offers the best security features like BitNinja server security, Network firewall and web application firewall. You can also count on SSL by Let's encrypt SSL and the advanced ModSecurity. Even the cheapest plan offers all the other mentioned features as well as daily backups, spam filtering and malware scanning

Website essential services

- 1 free website transfer
- 1 free domain transfer
- Free website setup
- Had websites recovery
- Free website builder with premium themes.
- Smooth and fast sign-up process with instant activation.

Their renewal rates are high, but you will certainly get a discount upon chatting with a customer service executive. You will also get many discounted offers on premium plugins and themes like 20% discount on WP rocket – the best caching plugin.

Support

24×7 live chat support with normal response time within 1 minute.

[Open and account with FastComet](#) by clicking the banner below.

FastCloud Actually Optimized for WordPress Hosting

Strong account and website security, Out-of-the-box optimization, and real 24/7 Technical Support

FastGuard
WORDPRESS SECURITY

RocketBooster
WORDPRESS SPEED OPTIMIZATION

Premium Support
DEDICATED WORDPRESS SUPPORT

Observer Monitoring
WORDPRESS RESOURCE MONITORING

Drawbacks

The basic plan claims to have unlimited bandwidth on its sign-up page. However, if you look at the terms and conditions, it says unlimited subject to Fair usage. If you talk to the customer service executive, they will clearly tell you that it is around 30 GB monthly traffic. Well that should be more than enough for a new blogger or a new website. But if your domain name gets a Bot attack, your website can easily get more than 300 MB bandwidth daily.

However, this isn't any hard limit and FastComet will not shut down your website if it breaches the 30 GB limit. If it happens their customer service team will send you a notice with some detailed report and suggestions. Effectively they will try to help you optimize your website for better results utilization and less bandwidth usage. You will also be given an option of possible upgrades

In terms of server speed, it is actually not NGINX or Lightspeed backed. This Apache based server speed will generally be a bit slower than other two kinds of servers.

Host Armada ★★★★★

A high performance WordPress web hosting with NGINX backed super speed, high level of security, and superb customer service is what you will get when you open an account with HostArmada. Their basic plan is priced at around \$3 (75% discount) if you [follow this link](#). It comes with a 45-day money-back guarantee.

HostArmada is amongst the best 4.9 out of 5 rated WordPress hosting services. The most basic plan is a feature-packed one with various useful features.

The banner features the Host Armada logo at the top left, with the tagline 'SPEED - SECURITY - STABILITY'. Navigation links for 'Hosting', 'Domains', 'About Us', and 'Technology' are in the top right, along with a 'SIGN IN' button. The main headline is 'Managed WordPress Hosting', followed by the subtext 'Fast, reliable and secure Cloud SSD Web Hosting Packages for your WordPress website!'. A list of features under 'All plans include' includes Free cPanel, Free SSL for all sites, Web Server Cache, Daily Backups, Cloud SSD Storage, and Support 24/7/365. The pricing is highlighted as 'Starting at \$3.33/mo'. At the bottom are 'Get Started' and 'Plans & Pricing' buttons. An illustration of two people interacting with a server interface is on the right.

HOST ARMADA
SPEED - SECURITY - STABILITY

Hosting Domains About Us Technology SIGN IN

Managed WordPress Hosting

Fast, reliable and secure Cloud SSD Web Hosting Packages for your WordPress website!

All plans include

- ✓ Free cPanel
- ✓ Free SSL for all sites
- ✓ Web Server Cache
- ✓ Daily Backups
- ✓ Cloud SSD Storage
- ✓ Support 24/7/365

Starting at **\$3.33/mo**

Get Started Plans & Pricing

Basic infrastructure and resources

HostArmada has top of the line infrastructure and technology stack. All plans benefit from the following features.

- 15 GB Cloud SSD storage
- Free daily backups
- Can host single website only
- Unlimited database
- Unlimited emails
- Unlimited FTP account
- 2GB RAM and 2 CPU core
- NGINX servers
- 9 Datacenters spread across the world.

Two exceptional features at such low price I would highlight are Cloud SSD drives and NGINX/Litespeed. Cloud SSD as you know have much higher speed and high durability than normal SSD. This will definitely improve your website's overall speed and performance.

Security

It offers the best security features like Bot attack protection, DDOS protection, Network firewall and Web Application Firewall. You can also count on SSL from Sectigo and the advanced ModSecurity. Even the cheapest plan offers all the other mentioned features as well as daily backups, spam filtering and malware scanning

Website essential services

- 1 free website transfer
- 1 free domain transfer
- Free website setup
- Hacked websites recovery
- Free website builder with premium themes.
- Smooth and fast sign-up process with instant activation.

Their renewal rates are high, but you will certainly get a discount upon chatting with a customer service executive.

One superb discount offer you can find here is that of the highest shared hosting plan, the Speed Reaper. It is priced at just \$1.5 more but has 3 times more power, 3x more services, unlimited websites, FREE private DNS, and a host of other features. It is backed by a LiteSpeed server as well.

[Click here](#) or below if you would like to open an account with HostArmada

SPEED • SECURITY • STABILITY

**The Hosting Armada
behind your SUCCESS!**

MANAGED • CLOUD • HOSTING

Most hosting providers have a huge difference between their start-up and top-of-the-line shared WordPress hosting plans. But HostArmada gives you the best experience. If you are thinking of going for HostArmada, I would any day recommend [taking the Speed Reaper plan](#).

Powered by 

DreamHost ★★★★★½

Start in 1996, Dreamhost powers 1.5 million websites. It is a WordPress hosting with super speed, high level of security, and a superb customer service. Their basic plan is priced at less than \$3 (75% discount) [if you follow this link](#).

Dreamhost is one of the 5 hosts recommended by WordPress and comes with an unparalleled world-class 97-day money-back guarantee. It means you have more than 3 months to evaluate the WordPress hosting provider.

Basic infrastructure and resources

Dreamhost has great infrastructure and technology stack for its price. Even the cheapest plan has brilliant features.

- 97 days money-back guarantee
- FREE domain name for 1 year
- 5 sub-domains
- 50 GB SSD space
- Unlimited Bandwidth
- Free daily backups
- Can host single website only
- 6 databases
- 6 FTP account
- 1 GB RAM and 2 CPU core
- Free Domain Privacy in case you didn't get it [from your domain name provider](#)

Security

Dreamhost offers the best security features like Bot attack protection, Network firewall and Web Application Firewall. You can also count on FREE SSL certificate and advanced ModSecurity. All plans offers all the above mentioned features as well as daily backups, spam filtering and malware scanning.

Website essential services

- Comes with free WordPress migration tool
- Free website builder
- Free website setup
- Smooth and fast sign-up process with instant activation.

One more differentiating points of Dreamhost is its overall price transparency. Before you sign up, you can clearly see the charges applicable to all of its services.

Drawbacks

- Email is not free, but it's not expensive either – only \$1.65 for unlimited emails
- No data centers outside US
- No LiteSpeed / server-side caching
- Limited live chat support – not 24×7
- No cPanel

In terms of server speed, it is actually not NGINX or Lightspeed backed. This Apache based server speed will generally be a bit slower than other two kind of servers.

Live chat is available only between 5:30AM and 9:30PM Pacific Time. However, you can raise a support ticket 24/7.

You may [click here](#) or the banner below to get started with Dreamhost.

MilesWeb ★★★★★

The screenshot shows the MilesWeb website with a festive Christmas theme. The header includes the MilesWeb logo, navigation links for Hosting, Reseller, VPS, Servers, and Domain & SSL, a sales contact number (1800 266 3133), and a LOGIN button. The main banner features the text 'Pay for Web Hosting & Get Domain for FREE!' with a list of benefits: 'Free SSL with all plans', 'Highly-reliable and super-fast', and '24/7 top-rated support'. The price is listed as 'at just ₹40 /mo' with a note to 'Buy and renew at the same cost! No hidden charges.' A red 'Get Deal' button and a 'Chat With Us' link are present. On the right, there is a large illustration of a Christmas tree with lights and ornaments, and several wrapped gifts at its base. A red tag with 'FREE DOMAIN' is also visible.

MilesWeb is an India based WordPress hosting at the lowest price but with the highest hosting quality, features and impressive support staff. They offer you the best package for its hosting price. I would recommend you [taking the Swift Plan](#), priced at less than \$3 (75% discount) [if you follow this link](#). It also comes with a 30-day money-back guarantee.

Basic infrastructure and resources

MilesWeb has one of the best infrastructure and technology stack for its price.

- Unlimited SSD storage, subject to Fair Usage
- 1 FREE domain name for one year
- Free daily backups
- Can host single website only
- Unlimited database
- Unlimited emails
- Unlimited FTP account
- 3 GB RAM and 3 CPU core
- Comes with a free automated SEO tool
- 6 Datacenters spread across the world.

Security

It offers the best security features like Bot attack protection, Network firewall and Web Application Firewall. You can also count on FREE SSL certificate and advanced ModSecurity. All plans offers all the above mentioned features as well as daily backups, spam filtering and malware scanning.

[wprpi cat_id="107"]

Website essential services

- 1 free website transfer
- Free website setup
- Smooth and fast sign-up process with instant activation.

MilesWeb is a one of the most feature-packed WordPress hosting service with even the most basic plan having superior features.

You may [click here](#) or the banner below to get started with MilesWeb.

To the right, it lists features: 'Free Domain*', '30 Day Money Back', and 'Free SSL & CDN'. Next to these is a price tag '₹ 40 /mo' and a 'Try Now' button. On the far right, there is a photo of a smiling woman and the MilesWeb logo.

TMD Hosting ★★★★★

A screenshot of the TMD Hosting website. The header includes the TMD Hosting logo and navigation links: HOME, WEB HOSTING, CLOUD HOSTING, WORDPRESS HOSTING, VPS HOSTING, RESELLER HOSTING, DEDICATED SERVERS, and AFFILIATES. There are also buttons for LOGIN and CALL US. The main banner features the text 'Linux Shared Web Hosting', 'Fully Managed Hosting, Cutting Edge Technology', and '12th Year Anniversary Promo'. A large orange text overlay says 'NOW -40% OFF'. Below this, there are four icons with descriptions: 'Unlimited e-mail accounts', 'The easiest Drag & Drop sitebuilder', '1 click WordPress and 300+ apps', and '24/7/365 The Most Dedicated Support'. A 'GET STARTED NOW' button is at the bottom left. On the right, there is an illustration of server racks.

TMD Hosting has been operating from the USA since 2007 as a website hosting provider. They offer one of the lowest prices but come with quality hosting plan features and prompt support staff. Their starter plan for Website hosting, not WordPress hosting, comes priced at less than \$3 [if you follow this link](#). It also comes with a 60-day money-back guarantee.

TMD hosting promises 16x faster page loading speed in every plan, including the cheapest one. They achieve that after combining three layers of caching (APC, OPcache, and Varnish) and solid-state drives (SSDs)

Basic infrastructure and resources

TMD Hosting is a one of the most feature-packed WordPress hosting service with even the most basic plan having superior features.

TMD Hosting has a really good infrastructure and technology stack for its price.

- FREE Weebly Sitebuilder
- Free Domain for first year.
- Renewal price is just \$4.95 and negotiable
- 60 days money-back guarantee
- 3 layers of caching (APC, OPcache, and Varnish)
- 1 CPU and 1GB RAM
- Unlimited SSD storage, subject to Fair Usage
- 1 FREE domain name for one year
- Free daily backups
- Can host single website only
- Comes with a free automated SEO tool
- 7 Datacenters spread across the world.

Security

It offers “military-grade security” through its BitNinja powered web-based firewall. Other security features include Bot attack protection, Network firewall and Web Application Firewall. You can also count on FREE SSL certificate and advanced ModSecurity. All plans offers all the above mentioned features as well as daily backups, spam filtering and malware scanning.

Website essential services

- 1 free website transfer
- Free website setup
- Smooth and fast sign-up process with instant activation.

You may [click here](#) or the banner below to get started with TMD Hosting.

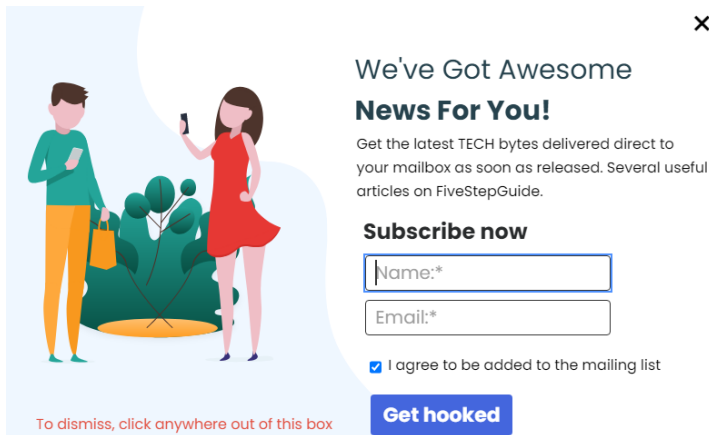

Drawbacks

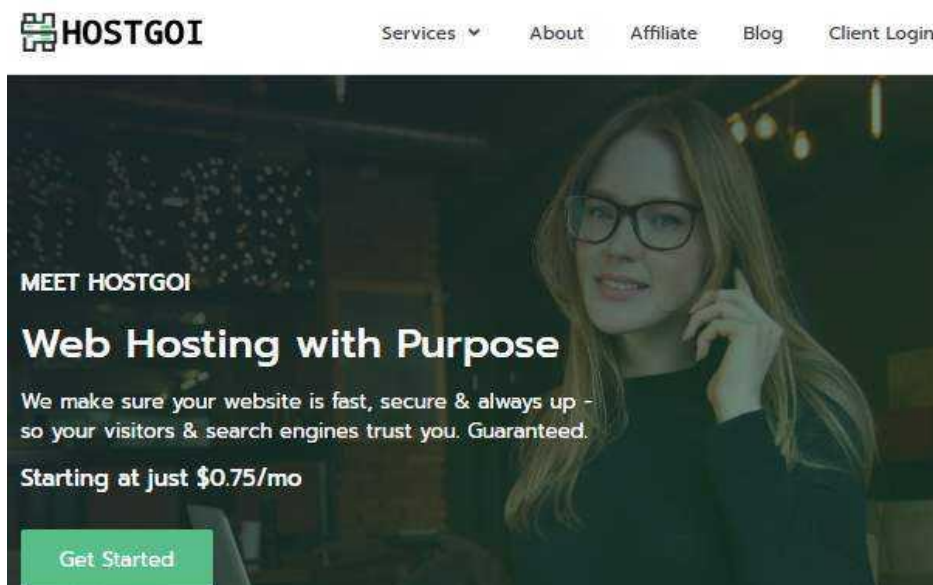

In terms of server speed, the starter plan at less than \$3 is actually not NGINX or Lightspeed backed. This Apache based server speed will generally be a bit slower than other two kinds of servers.

The starter plan offers only 1 GB RAM and 1 core CPU

HostGoi ★★★★★½

It's just a 3-year-old company but has steeply climbed the ladder of the cheap WordPress hosting providers. It comes with reliable uptime, fast server speed, and feature-packed really cheap shared hosting plans. They also have superb uptime and fast page loading speeds.

Their exceptional 24/7 live chat and phone support will help you easily sail you though all hosting problems. In case you don't like it, there is a 7-day money-back guarantee.

Their basic plan is priced at less than \$3 (75% discount) [if you follow this link](#).

Basic infrastructure and resources

HostGoi has as good infrastructure and technology stack as its competitors.

- Unlimited bandwidth, subject to Fair Usage
- 50 GB SSD storage
- Free daily backups
- Can host single website only
- Unlimited databases
- Unlimited emails accounts
- Unlimited FTP account
- GZip and Brotli Compression
- 2 GB RAM and 2 CPU
- Litespeed cache on server

Security

It offers the best security features like DDoS protection, Bot attack protection, Network firewall and Web Application Firewall. You can also count on FREE SSL certificate and advanced ModSecurity.

Website essential services

- 2 free website transfer
- Free website setup
- Smooth and fast sign-up process with instant activation.
- Great support – they fix the issues easily without much hassles

[Fivestepguide.com](#) runs on HostGoi WordPress hosting, and I can tell you I don't regret it at all. Customer support is delightful. Infra and features at their price are fantastic.

[Click here](#) or banner below to open an account with HostGoi.

So, where did I actually spend money?

Why I chose [HostGoi](#)? Apart from the review and offerings I have detailed above, I felt I need to keep my expenses to the minimum while I test waters on a starting a new blog. I have started writing after 12 years and the internet and the blogging world in general is full of superb content. You will almost certainly find a satisfying answer to every question you may ask.

So, I decided to rather start with spending money on the following:

- A hosting with quality service and great infra and features at bare minimum costs
 - [Buy HostGoi hosting](#) plans if you are a new blogger and trying to test your new-found passion of blogging.
- 4 domain names – [fivestepguide.com](#), [5stepguide.com](#), [startwithfin.xyz](#), [5sg.top](#)
 - Why 4? So that I own both the alphabetical and numeric past of my domain name. The smallest one is to create short URLs for links to my website.
- A couple of necessary and extremely useful themes and plugins to make my website load super-fast ([A-grade GTMetrix with 98% score](#)) even with a \$1 per month hosting service.
- [Back-links](#) tools, search engine submission tools and SEO tools
- 2-month supply of Nescafe 3-in-1 coffee sachet while working every night creating this fast loading WordPress website and in writing all such articles

I suppose you must have already bought the domain name. If not yet, I suggest you read [my honest opinion](#) and buy from one of the best domain name registrars, especially for superb customer support service. Buy Domain name by clicking at the banners below.

A banner for Namecheap with a blue background. On the left is the Namecheap logo. In the center, it says "Buy Domains from \$0.99/yr" and "Start your business now". On the right, there is a cartoon hedgehog holding a sign that says "0.99" and a red button that says "Buy now".

A banner for Domain.com with a black background. On the left, it says "READY TO GET ONLINE?" and "It all starts with a great domain." On the right, it says "10% off with code DOMAIN10" and "DOMAIN.COM". There is a red button that says "GET STARTED" and "Exclusions Apply" below it.

A banner for Namesilo with a yellow and orange background. On the left is the Namesilo logo with the tagline "domains. cheap, easy and secure." In the center, it says "Cheapest Domains". On the right, there is a red button that says "Click Here to Compare Today".

So, the steps are: choosing the web hosting with the best quality customer support team, creating the best looking website by installing super cool plugins, and improving the performance of your website to [copying my formula](#) for A-grade GTmetrix scores.

Buy [WP-rocket WordPress caching](#) plugin by clicking here or at the banner below

The next step in line is SEO → Yes, it seems easy and simple but is the utmost difficult and time-consuming step. To make it easier, you can install RankMatch or Yoast SEO (premium version has much more features).

Selecting the best keywords for higher ranking and lead-generation is the most difficult tasks in all SEO tasks. However, to our rescue, the [best SEO tool](#) named SEMrush is extremely useful.

Thank you for downloading this article.

You may visit the [Website metrics section](#) where I discuss nuances of WordPress websites, how to make websites faster, how to COPY my formula to speed up your website. You may click below to visit any of the best articles.

FAQ (Frequently asked questions)

Which is the fastest WordPress web hosting?

There is no definitive answer to that since it depends on many factors. Factors like

- if your website is hosted on a shared WordPress hosting server or a dedicated server
- does your hosting have NGINX or LightSpeed server cache enabled
- what's the CPU and RAM configuration of your WordPress hosting plan, especially if you are on a shared web hosting plan

Since this article is about budget shared WordPress hosting services, you have 2 options:

1. If you are just starting out like I did in 2020, choose any one out of the 9 WordPress hostings offered at less than \$3 a month.

2. If u have some experience or want fastest, most stable and secure website with excellent customer support, choose Siteground

The fastest ones however are Kinsta, WPengine, cloudways or hostings from cloud computing companies like Google, Amazon and Microsoft.

Just to give you an idea on their pricing:

- Kinsta, WP engine start at around USD 20 a month.
- Cloudways starts at around USD 13 a month
- Amazon, Google, Azure are flexible in terms of pricing as per chosen infrastructure and uptime.

Is Siteground Singapore fast?

Country/Territory	Average connection speed (Mbps)
Taiwan	85.02
Singapore	70.86
Jersey	67.46
Sweden	55.18

re rows

ipedia.org › wiki › List_of_countries_by_internet,...
of countries by Internet connection speed

Siteground has a data center in Singapore.

It has 6 data centers all over the world, and Singapore is one of those. Since Singapore ranks #2 in the entire world for internet speeds, there is no doubt that Siteground is not just fast, but superfast!

The starter WordPress hosting plan for Siteground is [priced at \\$4.95](#).

How Fast is Fastcomet hosting?

Fastcomet has 13 data centers across strategic locations in the world. Most other \$3 hostings listed on this page might require you to sign-up for FREE CloudFlare CDN service. However, with 13 data centers, you have the option to host your website on whichever suits your audience. If your visitors are generally from Asia, you may choose Singapore. Likewise if your visitors are Primarily from the USA, you should probably choose Dallas.

With a superb server cache and a choice of data center close to your majority visitors location, I am pretty sure you can beat any of the top-rated web-hosting services.

Average uptime for whole of 2020 is 99.99% and the Average complete Load Time for a simple site is 1.55 sec

The starter WordPress hosting plan for FastComet is [priced at \\$2.95](#).
